Mirixa
The Power of Pharmacy®

Mirixa
The Power of Pharmacy®

Mirixa is a leading healthcare technology and services company. We identify and connect patients with trusted pharmacists for individualized medication counseling. Our innovative technology and services improve patients' health and reduce costs.

As an MTM pioneer, Mirixa harnesses the knowledge and skills of pharmacists to engage patients and deliver measurable results.

Pharmacists are widely regarded as the most accessible health professionals who are in frequent contact with chronic-care patients. Mirixa builds on this trusted relationship between pharmacists and patients to produce solutions with high patient engagement and satisfaction.

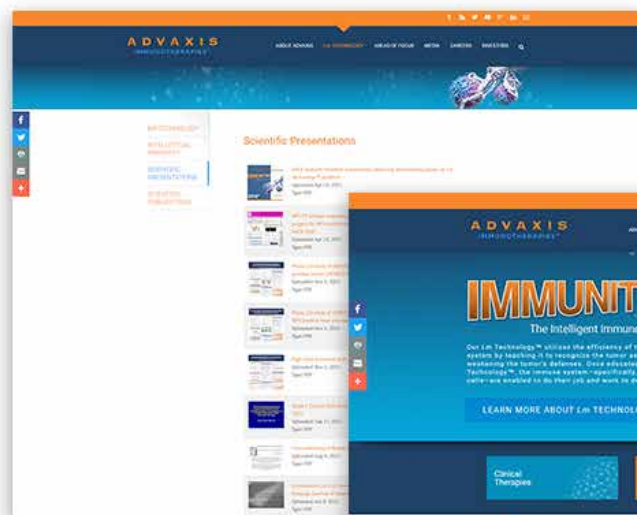

Our innovative and proprietary technology guides pharmacists to efficiently deliver high-quality patient counseling, to improve patients' health while simultaneously reducing costs.

Now celebrating our second decade, Mirixa was founded in 2005 by the National Community Pharmacists Association (NCPA).

The MirixaPro™ platform enables pharmacists to work closely with patients and their health care providers to:

- Resolve medication-related problems;
- Encourage proper medication use;
- Empower patients to actively manage their medications and health conditions; and
- Improve clinical outcomes for patients while helping reduce economic burdens to our nation's health care system.

The right move for U.S.?

Today's national security challenges are global in nature. Threats like terrorism, nuclear proliferation, and pandemic disease respect no borders. The United Nations can help provide the global reach and influence required to respond to, or ultimately help prevent, these threats from becoming crises. A truly unique body, the UN offers us the ability to communicate and collaborate with nearly 200 countries on a breadth of issues.

Whether providing famine relief, staunching nuclear proliferation, creating arms embargoes, boosting the moral and financial support of rogue actors, establishing global standards to prevent money laundering, or curbing the spread of pandemics like Avian Flu, the UN's work enables the United States to reap real national security benefits that advance American interests and make us safer and stronger here at home. Our economy also benefits, as the UN promotes goods and services from more than 3,000 businesses across the U.S.

No doubt, U.S. contributions to the UN must be judicious and prudent. Accountability, transparency, and effectiveness are essential for any organization, including the UN. At the same time, our ability to tandem share with other nations helps defray costs, promote stability, and enhance the impact of our resources. Withholding U.S. funding weakens both our influence and support for our national priorities, while strengthening the hands of our adversaries.

By actively using all of the real foreign policy, national security and economic tools at our disposal, we help develop the international knowledge, capability and capacity required to help address challenges that, if left to fester, land on our doorstep. We, the undersigned Republicans and Democrats, believe that support of the UN is one of the most cost-effective ways for the U.S. to successfully address global challenges and leverage our global leadership.

Best of scientific sessions 2004

WHEN
THURSDAY, NOVEMBER 11, 2004
12:00 - 1:30 PM (LOCAL) - 12:00 - 1:30 PM (GMT)
WEDNESDAY, DECEMBER 1, 2004
12:00 - 1:30 PM (GMT)

WHERE
At a flexible and professional venue

WHO
The program is for cardiologists, internists, cardiologists, nurses, respiratory, medical, pulmonary, physiology, pharmacology, and medical who focus on cardiovascular disease. The program is a 200-220 meeting for cardiologists, internists and pharmacology.

HOSTS
RUSSELL W. BARTLEY, MD, PhD
Chief, Medical, Office of Medical Research
LAWRENCE C. BLOOM, MD, PhD
Professor of Medicine
Stanford Center for Cardiovascular Science and Medicine
University of California, San Francisco, CA, USA

CHAIN
ACCORDING TO AMERICAN HEART ASSOCIATION
Chief, Executive of Scientific Sessions Program

OVERVIEW
The scientific sessions are a cardiovascular research and clinical research forum. It is a unique opportunity for researchers and clinicians to share their latest findings and discuss the latest research in the field of cardiovascular disease. The sessions are held in a state-of-the-art facility with a large audience and a high level of scientific and clinical research.

Learning objectives:
At the end of the educational program, participants will be able to:

- 1. Understand the latest research in the field of cardiovascular disease.
- 2. Understand the latest research in the field of cardiovascular disease.
- 3. Understand the latest research in the field of cardiovascular disease.
- 4. Understand the latest research in the field of cardiovascular disease.
- 5. Understand the latest research in the field of cardiovascular disease.
- 6. Understand the latest research in the field of cardiovascular disease.
- 7. Understand the latest research in the field of cardiovascular disease.
- 8. Understand the latest research in the field of cardiovascular disease.
- 9. Understand the latest research in the field of cardiovascular disease.
- 10. Understand the latest research in the field of cardiovascular disease.
